Selection & Preparation

Look for potatoes that are firm and fairly smooth.

Avoid potatoes with sprouts, green or dark areas and wrinkled skin.

Potatoes will keep for up to 2 months in a cool, dry, dark place that is well ventilated.

Do not wash before storing. Do not refrigerate.

Avoid placing potatoes in direct sunlight. Sunlight causes potatoes to green.

Never freeze individual potatoes. Can be frozen when part of a recipe such as stew.

Scrub potatoes with a vegetable brush before preparing. Cut away bad spots, sprouts and green areas.

Poke several holes in skin of potato before cooking.

4 medium baking potatoes
1 tablespoon vegetable oil

1. Preheat oven to 475°F.
